WE'VE MOVED!

**New
Scranton Branch
Location!**

FRAGILE

THE SCOOP!

We are happy to announce that our Scranton Branch has moved to a new location.

In need of more space for our growing northeast Pennsylvania operations, Mellon Certified Restoration found a new location for the Scranton Branch at the 10,500 sq. ft. building once occupied by the Mid Valley Candy Company. After extensive interior and exterior renovation, the Scranton Branch moved from its long term home in Dunmore to the property located on Lillibridge Street in Peckville.

While many employers are cutting back, closing their doors or moving their local operations to other counties or states, Mellon Certified Restoration is continuing its strong commitment to its clients and customers in Lackawanna and surrounding counties by once again investing in the local economy.

Always a strong community supporter, The Company recognizes the mutual benefits of community and business partnerships. "I believe it is the responsibility of all parties to work together to maintain viable local communities where businesses can grow and local residents can work. Over the years, our compact facilities served us well and our reputation for quality service has translated into significant growth. We were in need of more room and our # 1 priority was to locate a local facility large enough to meet our current needs and sustain growth in staff, equipment inventory and warehouse space. Once we saw the property, we knew we found our new home" stated Jim Mellon, President.

The official ribbon cutting ceremony was held on Thursday, July 28th, at the new facility. The event was attended by the Mayors of Scranton and Blakely Borough, local police officials, Chamber of Commerce officials, clients, neighbors and company representatives.

Contents Cleaning System

The Restoration Pro is a state-of-the-art assembly line cleaning process that significantly increases the efficiency and effectiveness of our contents restoration. The ultrasonic cleaning removes soot, mold and dirt more thoroughly, so that more items can be recovered. Using precision ultrasonic technology, the Restoration Pro system reduces small content cash out and provides an increase in processing speed.

Warehouse / Content Storage

Our climate controlled warehouse incorporates our content storage vaults, cleaning facilities and restoration equipment / supplies. Through the use of the latest in cleaning technology housed within our warehouse. MCR cleaning technicians are able to clean, sanitize and deodorize large household contents that, at first, may appear to be unrecoverable.
